NeuroSight

Closing the gap in Dementia Detection, Follow-up

Challenge of Delayed Diagnosis

60-75% diagnosed at **advanced** stages

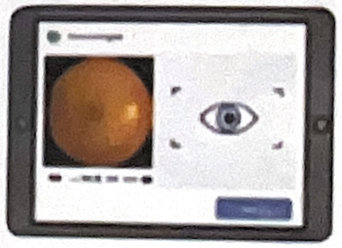

Current diagnostic tools like PET and MRI are too **expensive** and **inaccessible** for scale.

The Translation GAP in screening

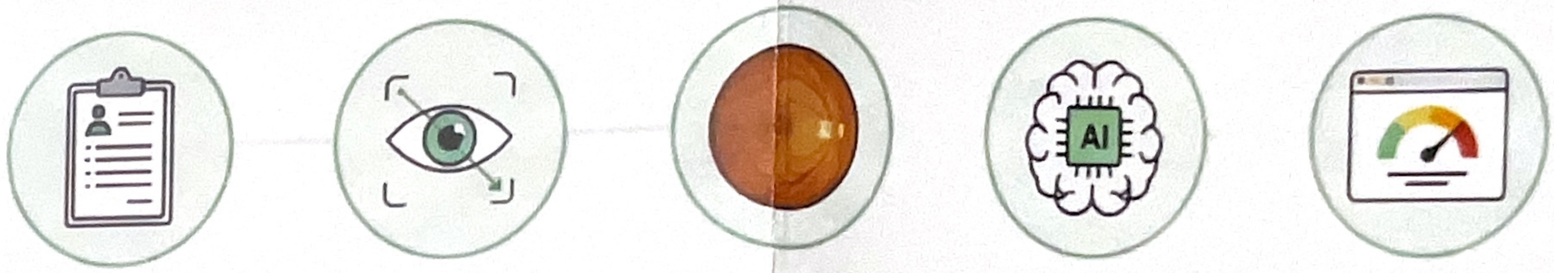

Routine eye care - underutilised at population level for neurodegenration risks.

- Portable
- Easy Integration in preexisting healthcare workflows
- Easy follow-up

Rapid 3-5 minute non-invasive screening

1. Registration
2. Eye-Tracking Tasks
3. Retinal Imaging
4. AI Risk Scoring
5. Results

Multi-modal neuro-ocular analysis

Saccade Latency | Fixation Stability | Retinal Vessel Caliber

Software extracts these features to compute risk.

Feature	Retinal AI	Eye-Tracking Tools	NeuroSight
1. Portable	No	No	✓
2. Eye Tracking	No	No	✓
3. Dementia Triage	No	Variable	✓
